## A self-taught web developer passionate about coding and web accessibility.

I have 2+ years of commercial experience of providing responsive SPAs. I enjoy turning complex problems into simple, beautiful and intuitive web applications. I'm a creative, energetic, result-focused and success-driven individual, who is constantly eager to learn new skills. I have recently developed an interest in web accessibility as I want my work to be a great experience for every user.

**May 2018 - Present: Schaufuss Entertainment / Rose Theatre Edinburgh**  
Responsive SPA built with Meteor.js and React.js. End-to-end commercial project for a local theatre. Features: dynamically created routes based on a show's name and a customised contact form. I'm currently managing the website for running shows.
